Important Information

Disclaimer This presentation has been prepared by Comet Resources Limited (“Company”). It does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. You should not treat the contents of this presentation, or any information provided in connection with it, as financial advice, financial product advice or advice relating to legal, taxation or investment matters.

No representation or warranty (whether express or implied) is made by the Company or any of its officers, advisers, agents or employees as to the accuracy, completeness or reasonableness of the information, statements, opinions or matters (express or implied) arising out of, contained in or derived from this presentation or provided in connection with it, or any omission from this presentation, nor as to the attainability of any estimates, forecasts or projections set out in this presentation. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of the Company. The Company reserves the right to update, amend or supplement the information at any time in its absolute discretion (without incurring any obligation to do so). Neither the Company, nor its related bodies corporate, officers, their advisers, agents and employees accept any responsibility or liability to you or to any other person or entity arising out of this presentation including pursuant to the general law (whether for negligence, under statute or otherwise), or under the Australian Securities and Investments Commission Act 2001, Corporations Act 2001, Competition and Consumer Act 2010 or any corresponding provision of any Australian state or territory legislation (or the law of any similar legislation in any other jurisdiction), or similar provision under any applicable law. Any such responsibility or liability is, to the maximum extent permitted by law, expressly disclaimed and excluded. Nothing in this material should be construed as either an offer to sell or a solicitation of an offer to buy or sell securities. It does not include all available information and should not be used in isolation as a basis to invest in the Company.

Future matters This presentation contains reference to certain intentions, expectations, future plans, strategy and prospects of the Company. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause the Company’s actual future results, performance or achievements to be materially different from those expected, planned or intended, recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. The Company does not warrant or represent that the actual results, performance or achievements will be as expected, planned or intended.

Competent Person’s Statement The information in this report that relates to Mineral Resources at the Springdale Graphite project and is based on information compiled by Matthew Jones, who is a Competent Person and Member of The Australasian Institute of Mining and Metallurgy. Matthew Jones is a consultant and was previously Exploration Manager of the Company. He has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Matthew Jones consents to the inclusion in this report of the matters based on his information in the form and context in which it appears. The information in this report that relates to Mineral Resources (under Listing Rule 5.12.2 to 5.12.7 “Foreign Estimates”) is an accurate representation of the available data and studies for the Santa Teresa Project, based on information compiled by Mr. Kristopher J. Raffle, B.Sc., P. Geo, who is a Professional Geologist registered with APECGBC (Association of Professional Engineers and Geoscientists of British Columbia) and is a principal of APEX Geosciences Limited. Mr. Raffle consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

ASX Announcements

Two highly prospective, exploration and development Projects in Tier 1 Mining Jurisdictions

Leveraged to **GOLD** and **COPPER** assets via positive precious and base metals thematic

Expert board and management with proven ability to identify opportunities and add value through exploration and development

Gold project JORC resource update completed, Mexico Project Manager appointed. Copper project drill ready subject to permitting.

Attractive current Company valuation – poised to unlock value through initial drilling programs on two known mineral deposits

Experienced Board

MATTHEW O'KANE | B. Bus Eco/Fin, MBA CPA

Managing Director

Matthew is an experienced mineral industry executive and company director with 25 years experience in the mining, commodities and automotive sectors. He has held senior leadership roles in Australia, the USA and Asia, in both developed and emerging markets, from startup companies through to MNC's. He has served on the board of mining companies in Canada, Hong Kong and Australia, and is currently a non-executive director of Azarga Uranium and Pursuit Minerals. During his career he has worked with company's involved in production as well as exploration and development of mineral resources

HAMISH HALLIDAY | BSc, MAusIMM

Non-Executive Chairman

Hamish is a geologist with over 20 years corporate and technical experience. He founded Adamus Resources Limited, a A\$3M float which became a multi-million-ounce emerging gold producer. He also co-founded Gryphon Minerals Limited and Venture Minerals Ltd, both successful junior explorers. He is currently Director of Blackstone Minerals Ltd, Alicanto Minerals Ltd and Venture Minerals Ltd

ALEX MOLYNEUX | BEc, GradDipMinExplGeoSc

Non-Executive Director

Alex is an experienced mining industry executive and financier. Prior to joining the mining industry, he spent 10 years in investment banking as resources specialist, including time as Head of Metals and Mining Investment Banking, Asia Pacific for Citigroup. Alex has held key leadership roles with Paladin Energy Ltd, Ivanhoe Mines Group and Ivanhoe Energy. He is currently CEO of Galena Mining Ltd and director of Argosy Minerals Ltd, Metalla Royalty & Streaming Ltd, Tempus Resources Ltd and Azarga Metals Corp.

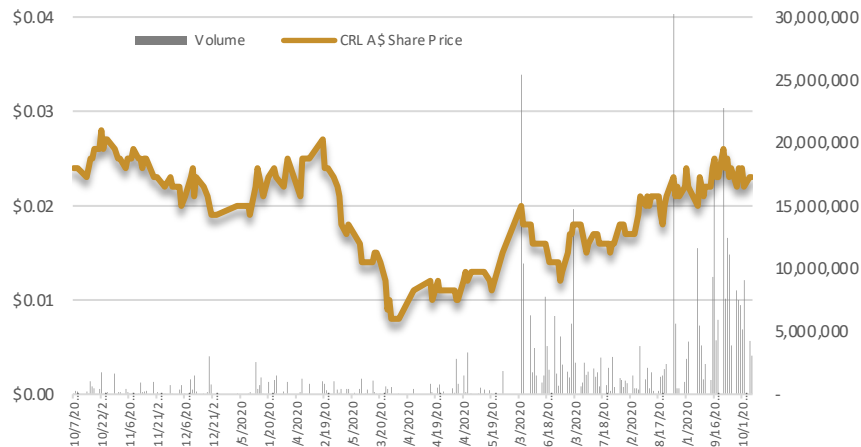

DAVID PRENTICE | MBA

Non-Executive Director

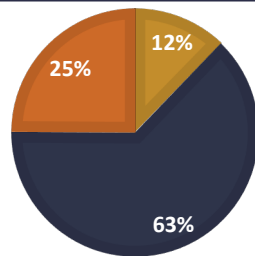

David is a senior resources executive with 25 plus years domestic and international experience. David started his career working for some of Australia's most successful gold and nickel exploration and mining companies. During the last 15 years, David has gained international oil and gas exploration and production sector experience as an executive and non-executive director. He is currently MD of Brookside Energy Limited, Chairman of Lustrum Minerals Ltd and NED of Black Mesa Production, LLC.

Santa Teresa Gold Project – High Grade + Resource Upside

Baja California, Mexico

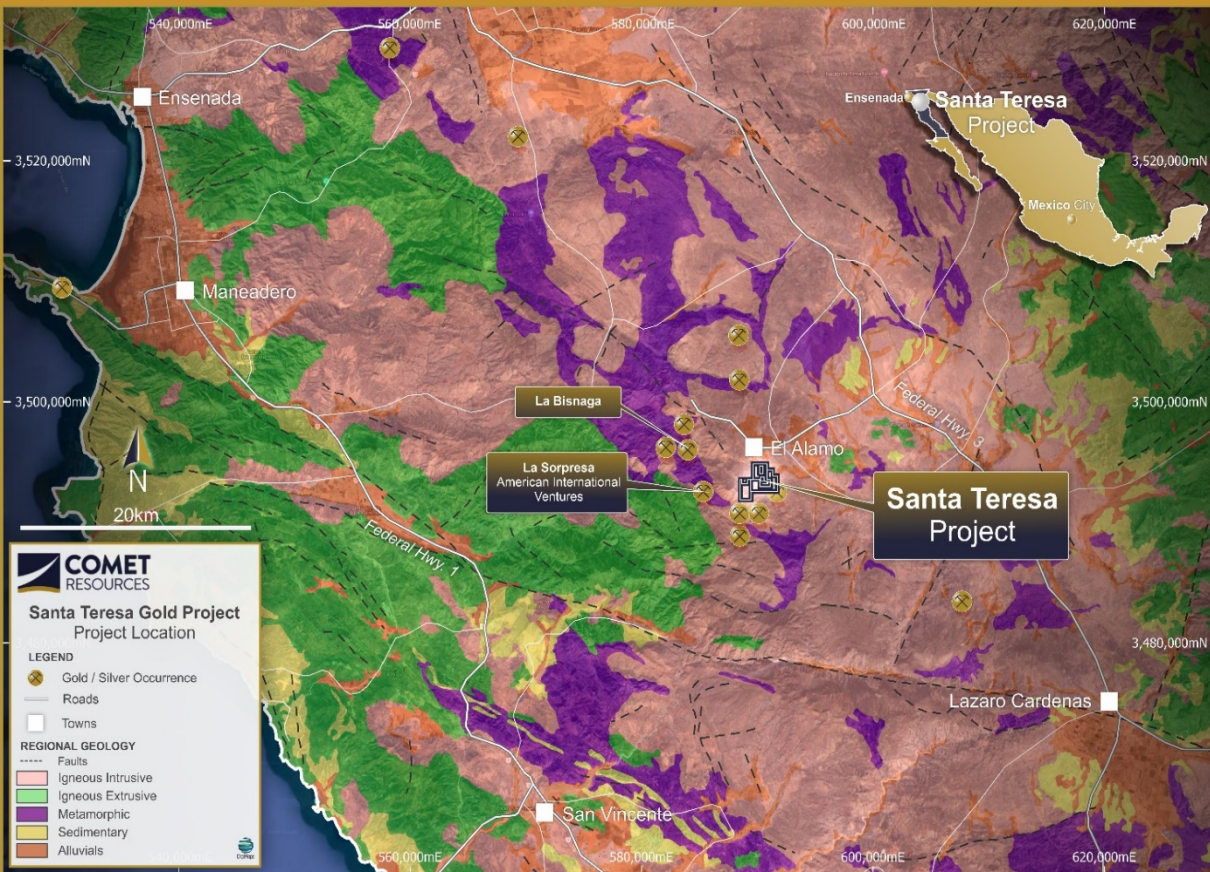

Santa Teresa is a high grade mesothermal lode gold deposit with high potential for resource growth

- JORC Inferred Resource of **89,000¹ ounces capped on a lode by lode basis** with a cut off grade of 2.5g/t and **average grade of 7.5g/t**
- At a top cap of 50g/t contained Au increases to **119 koz at 8.9g/t**, and uncapped to **174 koz at 13.1g/t**
- Historical drilling has intersected mineralisation up to **958 g/t over 1m**. Multiple drill results **assaying > 30g/t**.
- Deposit is **open along strike and at depth** providing attractive options for resource growth
- License on the north boundary **historically mined 100-200K oz at recovered grades of up to 9oz/t¹**.

Santa Teresa Gold Project – Stream Financing Available

Baja California, Mexico

Stream Financing from Raptor Capital – Raptor Executives also project level equity partners
(www.raptorcapitalstreaming.com)

- Project comes with a **\$US 20M streaming facility¹** (initial draw min \$US 6M) so development funding is non-dilutive
- **Financing is secured only against the Mexican properties.** Australian assets and parent company are ring fenced
- Options for **near term exploration upside** and near term production
- Ability to increase footprint in immediate project vicinity
- **Project Manager appointed** and on location in Mexico to drive permitting for initial drilling program

Mexico – Tier 1 Jurisdiction - Global Precious Metals Leader

Mexico is a mining friendly country

Mining in Mexico

- World's largest producer of silver
- 8th largest gold producer
- 9th largest copper producer
- 500 year history of mining – strong mining culture

Tier 1 Mining Jurisdiction

- Major's in the precious metals industry in Mexico: Newmont (Penasquito), Pan American Silver Corp, Americas Mining Corp.
- Fraser Institute Investment Attractiveness Index – Mexico ranks above NSW, VIC & NZ

Legal & Permitting Regime

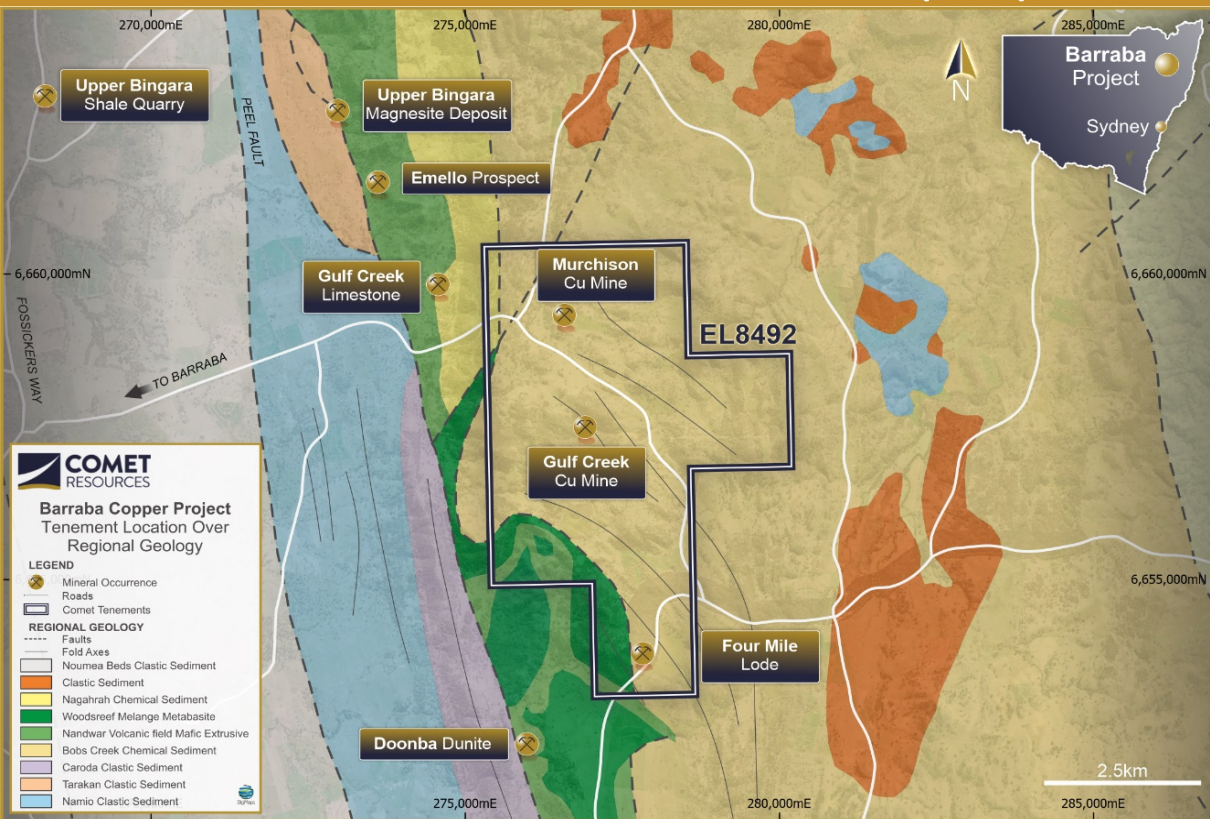

- Exploration, exploitation and beneficiation of minerals has preference over any other land use
- Exploration permits issued for 50 years
- Well structured regulatory and legal regime for mining

Mining Costs - Finances

- Labor cost inputs favourable versus Australian, US and Canadian mines
- Profits easily repatriated due to US Fed Swap Line access to US\$ for Mexico Central Bank (no African countries and only one South American country have this)

Barraba Copper Project

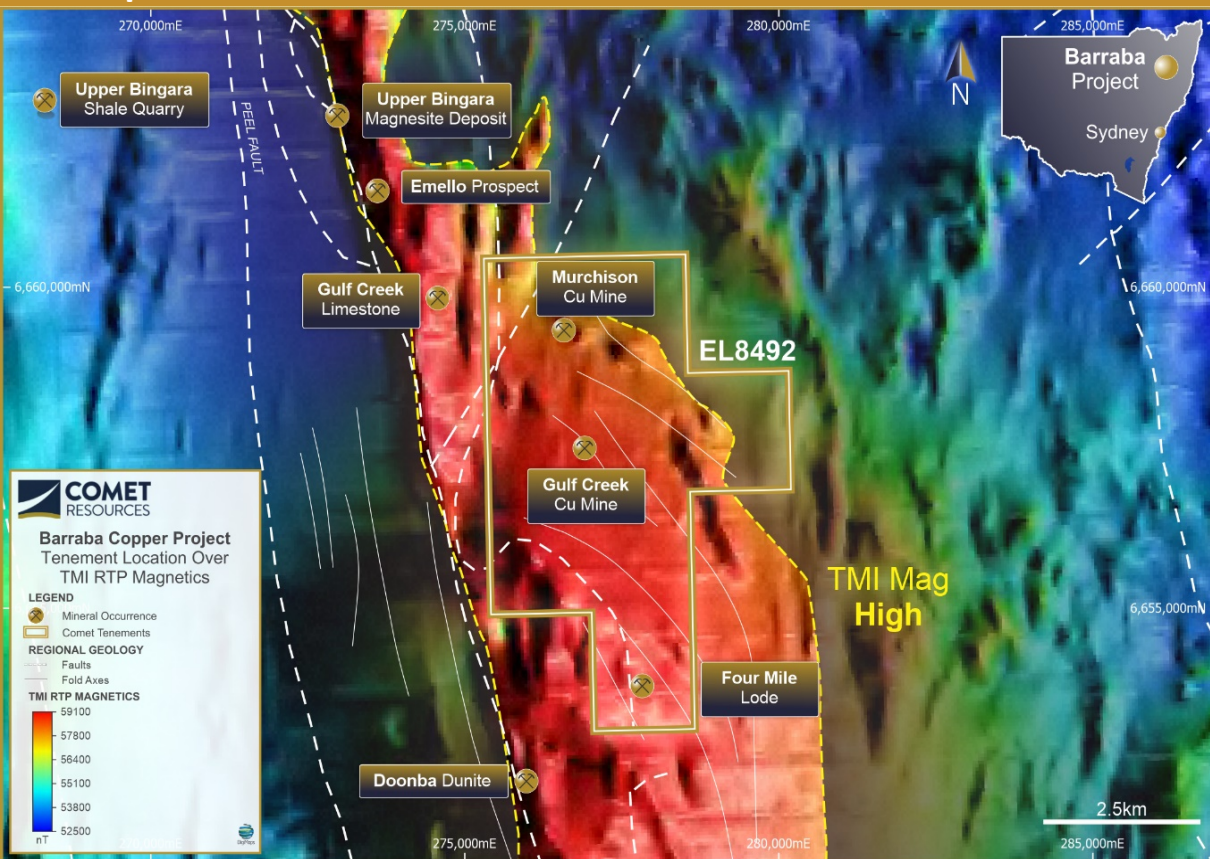

Barraba is a quality brownfields copper-zinc project
Substantial historic mine in a Tier 1 Jurisdiction (NSW)

- VMS deposit on the Peel Fault in the New England area of NSW
- Incorporates historical Gulf Creek Copper Mine (1895-1911) mining multiple lodes grading 2-6% copper (**Average 5%**)¹ to a depth of 150m on strike of 300m
- Deposit is open at depth and along strike.
- Zinc, which was not payable at the time of mining, was reported at 1-1.5X copper
- Gulf Creek has 3 known parallel lodes between 2-10m thickness within a 30m corridor
- Precious metals were also noted in historical records, but not assayed

Barraba Copper Project

Exploration Plan Q4 – 2020

- Historical information from Gulf Creek has been digitised by NSW based Geologist. The project is drill ready pending in progress permitting
- Drill holes are being planned to intercept known lodes below the historical workings
- Lodes are steeply dipping – approx. 70 degrees to the NE
- Initial program will utilise diamond drilling plus downhole geophysics and logging
- Downhole geophysics aim is to delineate blind lodes as well as additional parallel lodes
- Limited surface geophysics may also be undertaken in the immediate vicinity of Gulf Creek

Calendar of planned workstreams

Planned activities

Q3/Q4 – 2020 / Q1 2021

Barraba

- Final site visit by NSW based Geologist to complete logistics plans for drilling ✓

- Completion of exploration permitting
- Commencement of initial drill program

- Assaying and release of drilling results
- Completion of initial resource (subject to sufficient drilling information)
- Planning of stage 2 exploration program

2020 Q3

2020 Q4

2021 Q1

Santa Teresa

- Completion of Santa Teresa High Grade Gold Project Acquisition ✓
- Execution of full agreement on Stream financing with Raptor Capital ✓

- Release of initial JORC resource ✓
- Appointment of Mexico project management ✓
- Permitting for initial drilling program
- Initial drilling program (best case)

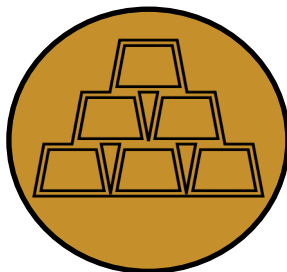

- Initial drilling program (worst case)
- Assaying and release of drilling results
- Revised JORC resource

Summary and Conclusion:

Valuation attractive – Next 6 months multiple potential price catalysts

- Two Highly Prospective, Exploration & Development Projects in Tier 1 mining Jurisdictions

- Leveraged to GOLD and COPPER via positive precious and base metals thematic

- Expert board and management with proven ability to identify opportunities and add value through exploration and development

- GOLD project JORC resource completed prior to commencement of initial field programs. COPPER project drill ready subject to permitting.

- Attractive current Company valuation – poised to unlock value through initial drilling programs on two known mineral deposits

Appendix: Springdale Graphite Project

Broad Zones of High-Grade Graphite

- Maiden Inferred Resource
 - 15.6Mt @ 6% TGC1
 - incl 2.6Mt @ 17.5% TGC
- Excellent Infrastructure
 - 150 kms west of Port at Esperance
 - Grid power
 - Piped gas
 - Sealed roads
 - Freehold land
- Secured option to acquire farmland
- Top mining jurisdiction
- Looking for JV
- Highest grade intersection returned at Springdale of **3.23m @ 51.02%**
- Total Graphitic Carbon (TGC) from **35.27m within 42.5m @ 17.02% TGC** from 20m in hole HD024A2
